TERMS & CONDITIONS

All prices in this catalogue are AUD and include 10% GST and effective from July 2024. While correct at time of publication prices are subject to change without notice. For items not listed in this catalogue please note that a minimum 25% deposit will be required upon ordering.

Mail and freight orders are accepted. Please contact The Clay Shed prior to ordering should pricing confirmation be required. Freight costs are not fixed, and are based on the order's size and weight, and fluctuating fuel levies.

Goods will only be accepted for return if prior arrangement has been obtained within 7 days of receipt of goods. Title and ownership of goods does not pass to the purchaser until payment in full has been made. Until such time goods remain the property of The Clay Shed.

All materials should be sampled for their suitability prior to use. It is important to prove their effectiveness under the particular conditions that they are to be subjected to.

Graffito works exactly like carbon paper. The Graffito sheets are embedded with a ceramic underglaze that will transfer to bisqueware when drawn upon using a stylus, ballpoint pen or pencil. This means that any image or photograph can be transferred to your ceramic piece. However, unlike carbon paper, Graffito colours remain after firing.

Graffito is designed to be put only on bisqueware. The pressure of the pencil/pen may indent the clay if it is used on greenware or leather hard clay. The medium is ideally suited for flat items like tiles, plates and trivets.

All colours except Pink (cone 06 to 4) can be fired from cone 06 to cone 8. Each sheet is a 23cm square.

Available in 12 colours

\$8.50/ sheet

Black Blue Brown Green Pink Teal Orange

Red Violet Turquoise White Yellow

Plain carbon tracing paper sheets also available \$1.50 / sheet

Use to draw patterns onto clay that wont repel colours and will burn away after firing.

Great for 'paint by numbers' style decorating on bisqueware.

TRANSFER PAPERS (IMPORTED)

Works on all stages of clay! (soft, medium, leather hard, bone dry and bisque)

Temperature Range: Cone 06-10. Zinc-free Clear Glaze Recommended.

Duncan Pure Brilliance® Brush-On Clear Glaze

How to Use

1. Mix clear glaze with palette knife.
2. *Sponge Application:* Dab a clean sponge into glaze and dab one coat over colours on surface of bisque to cover. After the sponged coat has dried thoroughly, load glaze brush with glaze and brush on two coats. Allow to dry between coats.
3. *Brush Application:* Load a glaze brush with glaze and apply two flowing coats. Let dry between coats.

Special Effects glaze in combination with Turquoise gloss glaze on Cone 6 White

BME110 Speckled Medium

Want to enhance your pieces? Add a teaspoon of speckle to ANY glaze to instantly give you that wow factor!

You control the process - add 5 to 10ml to 500mls of Glaze to achieve your desired results.

Fired results will vary according to Fired Temperature.

Fire glaze to recommended temperature - 1080°C - 1280°C.

DID YOU KNOW?

BMG190 Special Effects is not a stand alone glaze. It is applied under another glaze to give a microcrystalline appearance.

Not suitable for use with Cadmium based glazes.

For best results the lustre should be applied evenly to clean glazed surfaces with a flat camel hair or sable brush.

A much thinner application should be used if firing on glass. Too heavy a coat will blister or flake. Uneven coats may cause variations.

Thin, even applications of lustres are a must. If a deeper colour is desired, then reapply the material being used and refire. Never pat a spot, but go over the entire area and refire. Lustres can be applied over one another as long as you fire in between.

Work in a dust and draft free area. Dust and moisture are the two most detrimental elements in working with lustres. Clean the surface of the glaze with a cleaner to remove any dust, finger-paints, or grease-like coatings sometimes found on the ware after glaze firing.

Lustres vary in viscosity and workability. Those that appear thick and tacky can be conditioned by adding a few drops of Lustre Thinner. Lustres may be also thinned further and applied by spraying.

Not all colours or quantities are kept in stock. Please call ahead to confirm or special order.

for application to glass and glazed ceramic

The Three Cone System

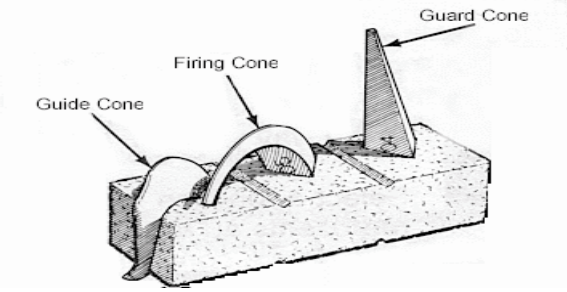

While a single cone may be used on a shelf to “witness” the firing, it is recommended to use three different cones.

The group consists of a Firing Cone - the desired cone for the ware being produced; the Guide Cone - one cone number cooler; and the Guard Cone - one cone number hotter than the Firing Cone.

These cones need to be set deep in the kiln, yet should be visible through the bung hole.

When the Guide Cone starts to bend, the ware is approaching maturity.

The bending of the Firing Cone indicates that the firing is at its correct stage. If the Guard Cone has bent, the firing has passed its best time-temperature window.
